Satellite Communications Engineering

Colorado Professional Resources (CPR) has a suite of professional engineering services that address engineering and analysis, simulation, software engineering, and training. CPR brings the experience, skills, and understanding needed to support your mission today, tomorrow, and five years from now. The CPR staff is comprised of experienced project managers, software/simulation engineers, simulation developers, IT experts, and professional engineers who are committed to ensuring best value, highest quality of service, and sound advice. CPR has successfully performed as both Prime and Sub-contractor on complex, federal projects since 1987. As a result of CPR's pursuit of unparalleled service delivery excellence, a well-defined process has emerged that results in the continuous application of quality and reliability.

Engineering and Analysis Services

- Protected Military Satellite Communications
- Extremely High Frequency (EHF) Satellite Communications Requirements
- Advanced EHF Mission Planning Element (MPE) Design Analyses
- Terminal Data Flow Policies and Procedures
- Terminal Image Development and Distribution
- Global SATCOM Support Center Operations
- Joint AEHF Extended Data Rate (XDR) Concept of Operations
- End-to-End Systems Engineering

Simulation Services

- Cheyenne Mountain Training System
- Air Force Satellite Control Network (AFSCN) Simulations
- Global Positioning System (GPS) Simulations
- Defense Support Program (DSP) Simulations
- DSCS III Simulations
- Milstar Simulations
- Command & Control System-Consolidated (CCS-C) Simulations

Training Services

- Software Certification and Accreditation
- Homeland Defense/Security Projects
- Space Fundamentals Training Course
- Crew Resource Management
- U.S. Air Force Academy Research Labs

Software Engineering Services

- Custom Application Services
- Integration of Commercial Off-the-Shelf Applications
- Custom LAN Services
- Custom Database Services
